  • Community Cancer Awareness Activities 10–11
SJMC Cancer Program Accomplishments

Cancer Committee accomplishments spanned a broad spectrum during 2013 & 2014 and resulted in improvements in programmatic, clinical, quality improvement, and community outreach endeavors listed as follows:

**PROGRAMMATIC**

- The SJMC Breast Program was surveyed in March 2013 by American College of Surgeons National Accreditation Program for Breast Centers (NAPBC) with an outcome of full accreditation was received for three years.

- NAPBC standards presented & discussed as required at the 2013 & 2014 monthly Breast Work Group meetings.

- 2013 & 2014 St. Jude Kathryn T. McCarty Breast Center participated in National Quality Measures for Breast Centers (NQMBC) by submitting 24 quality indicators. SJMC Breast program received Level 2 certification and became a Certified Quality Breast Center.

- In March, 2014 the SJMC Cancer Program was surveyed by the Commission on Cancer for compliance with Cancer Program Standards 2012 (V1.2.1) Ensuring Patient- Centered Care and received 3 Year with Commendation, the highest possible score.

- In January 2014 a recertification for the Quality Oncology Practice Initiative (QOPI) occurred and resulted in re-certification through January 2017 verifying care delivery as per the core standards in all areas of treatment.

- As of 2014 the Palliative Care Outpatient Program is now based in the St. Jude Crosson Cancer Institute. The Nurse Practitioner is now available to see patients in her Cancer Center office.

- Beginning in 2013 and continuing in 2014 a SJMC Preoperative Prostatectomy class was developed and is offered monthly. The program is coordinated and presented by the GU Oncology Nurse Navigator and a Physical Therapist.

- In 2014 two new monthly Cancer Conferences begin as collaboration between St. Jude Crossan Cancer Institute and St. Joseph Hospital Center for Cancer Prevention and Treatment. Teleconferencing technology is employed for the Neuro-Oncology and the Liver, Bile Duct & Pancreas Conferences. Each facility presents patient cases for medical & ancillary staff education and discussion of treatment options per NCCN guidelines.

- The Genetics Program including St Jude Medical Center (SJMC) & City of Hope Genetics Program had a total of 436 patient referrals with 274 patients seen by the SJMC Genetics Counselor.

- During 2013 & 2014 discussion meetings on Survivorship Treatment Summary & Care Plan were underway. In 2014, the focus of planning was on Journey Forward Survivorship Summary with linkage to Cancer Registry database software.

- 2013 a Collaborative Action Plan is implemented between American Cancer Society (ACS) and St. Jude Crosson Comprehensive Cancer Center.

- Living Well with Breast Cancer education series of 4 classes which focuses on promoting a low-fat diet and healthy eating habits to reduce risk of recurrence of Breast Cancer is conducted.

- In 2014 the Shared Journey Program with Breast Cancer Survivors there are 15 volunteers. There are 59 women who are enrolled in the program.

- Shared Journey Program with Prostate Cancer Survivors & spouses begins in 2014. There are 4 volunteers and 4 patients enrolled in the program.
• Clinical Trial Screening SJMC & Partnerships UCLA/TORI & City of Hope is ongoing for all new oncology and radiation oncology patients. In 2013, a total of 53 patients or 4% of analytic cases were accrued to clinical trials. The Commission on Cancer threshold is 2% for Comprehensive Community Cancer Program and 4% for commendation.

• In 2013 Stereotactic Body Radio Therapy (SBRT) treatment was received by 11 patients. In 2014 there were 11 patients who received SBRT.

• Xofigo or Radium223 for the treatment of patients with castration-resistant prostate cancer (CRPC), symptomatic bone metastases and no known visceral metastatic disease one patient received treatment in 2013, 6 received treatments in 2014. In 2013 one patient received Cranial Stereotactic Radiotherapy in Radiation Oncology. In 2014 there were 5 patients who received treatment.

• 2013 Schwartz Rounds begins at SJMC, initiated by the Director of Cancer Services. A forum occurs monthly that is multi-disciplinary and provides an opportunity for medical & ancillary staff discussion regarding difficult emotional and social issues that arise in caring for patients and their families.

• 2014 SJMC Cancer Program Social Worker is participating in A Project to Assure Quality Cancer Care (APAQCC) - Research Project

• In 2014 Integrated Pharmacy Services that includes SJMC pharmacy, medical oncology and infusion center teams of St. Jude Heritage.

CLINICAL/QUALITY IMPROVEMENT

• In Radiation Therapy with Vision RT’s optical guidance technology, radiation therapy can be applied with the confidence necessary for today’s sophisticated treatment techniques. Using infrared cameras to monitor real time motion management knowledge of patient location ensures safe and accurate treatment. In 2013 Vision RT was utilized in the treatment of 28 patients. In 2014 there were 24 patients that received treatment with Vision RT.

• Studies of Quality & Quality Improvements 2013
  • SJMC Oncology Rehab Program demonstrates improved quality of life measures.
    1. Patients’ ability to fully participate in daily activities increased by 45 percent.
    2. Pain levels decreased 22-42 percent.
    3. Fatigue levels decreased 23-43 percent.

• A study of Palliative Care for Patients with Advanced (Stage IV) Lung Cancer at SJMC outcome shows an increase in referrals to palliative care in the metastatic lung cancer patients of SJMC from 2010 to 2013. In 2010, 37% of advanced lung cancers were referred to palliative and in 2013 60% of eligible patients had palliative care referrals.

• Sexuality and Fertility Study: SJMC interdisciplinary oncology team identified a staff educational deficit regarding cancer survivorship care. An educational series was presented that included education on sexuality and fertility in cancer survivorship care. Experts in the field of sexuality and fertility presented education to the interdisciplinary staff. The pre and post evaluation scores demonstrated a 27% increase in knowledge after the education. Additionally, QOPI measure 33 that assess fertility discussion with patients pre chemotherapy increased by 60%.

• Shared Journey Program provides individual support for the breast cancer patient from a caring and trained breast cancer survivor. Data collection of patient evaluations post participation in program include:
  1. Attitude toward cancer and treatments
  2. Communications with cancer team members
  3. Perception of self (body image, appearance)
  4. Inter-personal relationships with spouse/partner or family
5. Social relationships  
6. More in control of personal circumstances  
7. General outlook on life  
The outcome results demonstrated an overall benefit score of 82%  

• DNA Mismatch Repair Testing of Endometrial Carcinomas policy initiated at SJMC, Pathology Department: All newly diagnosed carcinomas of the endometrium in patients younger than 60 will be tested for abnormalities in DNA Mismatch Repair.  

• Monitoring of 2013 Cancer Conference case discussion for AJCC Staging is at 88%, NCCN Guidelines discussed is at 91% and Prognostic Indicators discussion is at 89%.  
  • 63% of all newly diagnosed breast cancer cases were presented at Breast Cancer Conference  
  • 73% of all newly diagnosed Lung Cancer cases were presented at Lung Cancer Conference  
  • 8% of all newly diagnosed GU Cancer cases were presented at General Cancer Conference  

• Monitoring of AJCC TNM Cancer Staging for 2013 demonstrates an overall rate of completion of 100% with an accuracy rate of 94%.  

• Monitoring for CAP data elements validated their presence in SJMC Pathology Reports at 100%.  

• 2013 Distress Management working group continues to improve on the process to coordinate and implement the utilization of the NCCN distress screening tool. Audits and tracking in Radiation Oncology and the Cancer Center Infusion Dept. and Medical Oncologists offices.  

• 2013 & 2014 SJMC sponsored, in conjunction with Mission Hospital Regional Medical Center and St Joseph Hospital, an Orange County Nurse Navigator conference.  

• Resource Guides created in 2013 for cancer patients and families: “Caring for the Caregiver”; “Head and Neck Cancer”; “For Young Adults”. Guides are available on SJMC Oncology Services network, Share drive.  

• 2013 & 2014 St. Jude continues to participate in The American Society of Clinical Oncology (ASCO) Quality Oncology Practice Initiative (QOPI) and conducts biannual data collection utilizing QOPI quality indicators.  

• St. Jude exceeded the 2013 QOPI national database in:  
  • Patient emotional well-being assessed by the second office visit.  
  • Documented plan for chemotherapy, including doses, route, and time intervals.  
  • Hospice enrollment and enrolled more than 7 days before death.  
  • Infertility risks discussed prior to chemotherapy with patients of reproductive age.  

• St. Jude 2013 scores were at 100% in the following indicators  
  • Adjuvant chemotherapy recommended within 4 months of diagnosis for patients with AJCC stage III colon cancer.  
  • Adjuvant chemotherapy received within 9 months of diagnosis by patients with AJCC stage II or III rectal cancer.  
  • Corticosteroids and serotonin antagonist prescribed with moderate/high emetic risk chemotherapy.  

• Physician review of Cancer Registry Data demonstrates  
  • Coding histology, grade, primary site, first course of treatment, and class of case correctly from 99% to 100%.  
  • Accuracy of Collaborative Stage as well as match to the physician TNM stage is measured. Compliance is 98%.  

• 2013 enrolled in Rapid Quality Reporting System (RQRS) for Cancer Data Management. 2014 new cancer cases and additional treatment information on existing cancer cases are transmitted monthly to the Commission on Cancer for the RQRS system update.

Analysis of Site Table

In 2013 St. Jude Medical Center had a total of 1451 cancer cases. Of the 1451 cases 1224 were new analytic cancer cases. These analytic cases were diagnosed at St. Jude and or received their first course of treatment at SJMC. 50% of the cases were female and 50% of the patients were male. The top five cancer sites at St. Jude Medical Center are Breast, Prostate, Lung, Colon and Melanoma cancers. 60% of the cancer cases at St. Jude in 2013 were diagnosed in Stage 0, Stage I, or Stage II.

2013 & 2014 Community Outreach

COMMUNITY OUTREACH
At St. Jude Medical Center cancer care Supportive Services, Prevention Activities and programs are based on a Community Needs Assessment.

Cancer Resource Library – the library provides information on comprehensive cancer treatment & support groups, books & brochures from ACS & NCCN, and computer internet. The library volunteers are available to assist patients & family members.

Volunteer Hours and Visitor Tally January – December 2013
• Total Volunteer Hours: 1343.50
• Total Visitor Encounters: 974

SUPPORTIVE SERVICES:

Support Groups:
The goal of the support groups is to provide a setting in which patients with cancer and their families can discuss living with cancer with others who have similar experiences. Support group discussion assists patients and families to cope with cancer care and treatment throughout the cancer care continuum. At SJMC these groups are led by a psychologist, social worker, nurse navigator and/or dietician.

Support Groups offered monthly:
• Brain Tumor Patient and Family Support Group
• Breast Cancer Support Group – For all women who have or had breast cancer
• HOPE: Cancer Patient and Family Support Group – For patients with any type of cancer and features a special breakout group for friends and family Look Good Feel Better – Self Image Promotion and Support
• Shared Journey Peer to Peer Support Program
• Relaxation and Visualization for Well-Being
• Go with the Flow Lymphedema Awareness
• Craft Night for Cancer Survivors and Support People
• Healthy Steps – Exercise Group (Requires Physician Order)
• Nutrition for Health and Cancer Survivorship – January - November, 2013 Total attendees: 206
• Yoga For Cancer Health – offered monthly
• Journey to Health Support Group (Requires Physician Order) – for patients who have completed treatment & desire support in managing their weight & improving their health.

Other Support sessions:
• Untie Your Ribbon Breast Cancer Survivor Retreat – October
• Magic of Support – December Christmas Holiday Support Group event
• Healing Hearts – Grief Group meets every Thursday (meetings) – attended weekly
• Healing Touch – Treatment Sessions, Ongoing Program
• Celebration of Life for staff, December
PREVENTION AND EARLY DETECTION/SCREENINGS
These programs identify risk factors and use strategies to modify activities and behaviors to reduce the chance of developing cancer

• The Every Woman Counts Program, although severely reduced by the state of California continues to provide free breast examinations, mammograms and follow-up care
• Genetic Testing and Counseling- Major population is Breast and Colon
• SJMC Low dose CT Lung Screening Program continues as a valuable entity of the Thoracic Oncology Lung Program – initiated in April, 2013, assists physicians in early diagnosis of lung cancers; screening is for high risk individuals as defined by the NCCN guidelines. Number of Screenings = 5, Abnormal findings = 4 (Patients referred to pulmonologist)
• SJMC Lung Nodule Screening – ongoing. Individuals who are found to have a pulmonary nodule are referred to a pulmonologist and follow up is planned based on NCCN guidelines. A clinic for the Pulmonary Nodule Screening Program was initiated in 2014. Case reviews are held monthly prior to Lung Cancer conference.
• 2013 Kick Cancer event at the Brea Mall – Cancer (Breast, Prostate, Colon, Lung and Skin) Education, prevention information provided to the community. Flu shots given. Total Attendees = 386
• 2013 Carnival of Awareness Cancer event – Cancer prevention & awareness presentations (Breast, Lung, Prostate, Colorectal, and Skin),
  • 42 Mammogram appointments scheduled at SJMC Breast Center,
  • Years from previous mammogram 1.5 - 2 years,
  • 36 mammograms completed with negative results, 2 rescheduled, and 4 cancelled.
  • If an individual has abnormal results they are referred to their physician and a surgeon. Treatment for abnormal results is based on NCCN guidelines.
